

Mousen Liquefied Gas Converter

Date: 2020/3/8

Version: 1

Product

Model number: GSS 3.2L

Introduction

The GSS 3.2L (same as 3.3L) is introduced for gas stoves and water heaters for homes or restaurants. It is expected to save 36% in high fires and more than 50% gas fuel in low fires, and the strong firepower does not deposit carbon.

Instructions

1. Cut off the gas pipe at 10-20 centimeters behind the gas regulator, and insert it into both ends of GSS 3.2L, then secure it with the retaining ring tight to prevent air leakage.
2. Turn the gas regulator by 3 to 4 turns counterclockwise. At regular intervals, it can be increased by 3 to 4 laps until the regulator can no longer be adjusted. A large fire can save about 40% gas fuel, and small fire gas fuel can be saved 1 times of fuel.
3. Thoroughly remove the carbon deposits and rust inside and outside the gas furnace pipe (including the nozzle) (the cleaner the cleaner, the faster the effect will be produced). After using about one or two barrels of gas, it will start saving.
